The diagram illustrates the relationship between  $V$  and  $\bar{V}$ , and how they connect to  $I$  and  $\bar{I}$ . It features two sets of vertical bars on the right side. The top set has three bars: the first is gray with a black border and contains the value  $0$ ; the second is white with a black border and contains the value  $V$ ; the third is gray with a black border and contains the value  $0$ . The bottom set also has three bars: the first is gray with a black border and contains the value  $0$ ; the second is white with a black border and contains the value  $V$ ; the third is gray with a black border and contains the value  $0$ . A horizontal line connects the top bar of the first set to the top bar of the second set. On the left side, there are labels:  $I$  above the first bar,  $I_{-}$  below the first bar,  $a$  below the second bar, and  $V$  above the second bar. There are also small black dots and a short horizontal line near the bottom center.
